

Process Definition Document (PPD) - Electricity Billing

Process Name: Electricity Billing Data Automation

Objective: Automate extraction, calculation, and reporting of electricity bills

Workflow Steps:

1. Extract billing data from CSV file (structured source).
2. Clean data (remove nulls, duplicates).
3. Calculate VAT (15%) and total payable amount.
4. Identify highest electricity usage per month.
5. Generate monthly billing summary report.
6. Email report to Finance Department.

Start Process

Read CSV Billing Data

Clean & Validate Data

Calculate VAT & Totals

Find Peak Usage Month

Generate Billing Report

Send Report via Email

End Process
